NodeJS, JavaScript,  
TypeScript, HTML, CSS

## LANGUAGES

Ukrainian (native)  
Russia (native)  
Greek (Fluent)  
English (advanced)

## ABOUT ME

I am a software engineer specializing in technology and financial innovation. With a strong focus on developing software projects, I have successfully created front-end applications for various domains. My ability to quickly adapt and excel in future projects is supported by my high capacity for self-learning.

## PROFESSIONAL EXPERIENCE

### Software Developer, ELTA Courier, Greece. (Jan 2012 - Dec 2012)

Designed and developed a desktop application to collect client information and store it in an SQL database. Successfully managed with Linux distribution.

### Automation Engineer, Retailer Chain, Ukraine. (Jan 2013 - Dec 2015)

Responsible for automation, data center, data processing and ERP managing. 3 times faster workflow based on previous 6 years. 1C ERP system also reduced labour and material cost by 30%.

### Strategy Manager and Design Executor, Crypto Industry Startup, Ukraine. (Jan 2016 - Dec 2020)

Designed and delivered blockchain solutions and NFTs. Specialised in web application development using the latest frameworks and libraries, AWS cloud solutions.

### Frontend Developer, Traders tool, Ukraine. (Jan 2021 - Oct 2022)

Development of a private solution for a cryptocurrency trading company. Implementation of new features that increased the end result by 20%

## PROJECTS

### MITO Automation SaaS Solution

Designed and deployed serverless application with more than 300 active users. Developed an automation web application that connects e-commerce website with popular product listing markets

### Web Development Freelancer, Self-Employed

Developed and launched multiple websites for clients in diverse industries. Implemented back-end functionality using frameworks like WordPress, Drupal, and custom PHP development.

### Notification Chat BOT

One of my notable achievements includes developing a chat bot using Python to monitor mining rig status and hashing power. By implementing efficient algorithms and utilizing real-time data, I significantly reduced downtime by several times, ensuring optimal performance and maximizing productivity.
