frameworks, object-

oriented programming,

AWS, Docker, Selenium,

Python, PHP, Ruby

LANGUAGES

Ukrainian (native)

Russian (native)

Greek (fluent)

English (advanced)

Bulgarian (elementary)

ABOUT ME

I am 34 years old detail-oriented Front-End Developer with more than 2 years experience working with HTML, CSS, Javascript, and TypeScript. Highly adept at both independent and collaborative projects, focus on cutting edge technologies and UX/UI design.

PROFESSIONAL EXPERIENCE

Front-end developer, Retailer Chain, Ukraine. (Jan 2020 - Feb 2022)

While working as an administrator, I transitioned to web development to align with company needs. During the project, I specialised in creating a web application to visually represent available products, gaining proficiency in front-end development and React.

Automation Engineer, Retailer Chain, Ukraine. (Jan 2013 - Feb 2020)

Launched and configured an ERP system for local sales, including hands-on database administration. I was engaged in server maintenance, staff training and the introduction of new working principles. The workflow has accelerated 3 times compared to the previous 6 years and also allowed to reduce labor costs by 30%.

Software Developer, ELTA, Greece. (Jan 2012 - Dec 2012)

Designed and developed a desktop application to collect client information and store it in an SQL database.

PROJECTS

Front-end developer, Solution for management athletes and teams

(Stack: React, NodeJs, Serverless)

The project is an ambitious effort to create a web-based platform designed to improve the management and coordination of the activities of sports teams of various types (football, basketball, hockey, volleyball, etc.). The project is being developed with the aim of making the process of training, competitions and organisation more transparent, efficient and convenient for all team members.

Front-end developer, MITO Automation SaaS Solution

(Stack: Angular, NodeJs, Serverless)

Designed and deployed serverless application with more than 300 active users. Developed an automation web application that connects e-commerce website with popular product listing markets.

Web Development Freelancer, Self-Employed

(Wordpress, Drupal, Laravel, Ruby on Rails)

Developed and launched multiple websites for clients in diverse industries. Implemented back-end functionality using frameworks like WordPress, Drupal, and custom PHP development.

Notification Chat BOT (Python)

One of my notable achievements includes developing a chat bot using Python to monitor mining rig status and hashing power. By implementing efficient algorithms and utilising real-time data, I significantly reduced downtime by several times, ensuring optimal performance and maximising productivity.
